Amanda Britto

RÉSUMÉ

Brazilian Portuguese game LQA · Game QA and functional testing

Montréal, Québec, Canada / LinkedIn ↗

Game LQA professional with experience at GlobalStep reviewing translation accuracy, terminology and narrative context. Combines linguistic testing with bilingual game writing and technical translation review.

Game tester with GlobalStep experience in functional testing, issue reproduction and build validation across mobile, PC and console. Also taught game quality and testing at Faculdade Impacta de Tecnologia.

EXPERIENCE

Game LQA / Game testing May 2025–present

GlobalStep

- Performed linguistic and localization testing of game text, reviewing translation accuracy, context, tone and narrative consistency.
- Reviewed translations and maintained terminology, glossaries and localization databases within editing workflows.
- Documented, tracked and validated bugs using structured QA workflows and Jira, Redmine, TestRail and Google Sheets.
- Tested game functionality and usability, reproduced issues with cross-functional teams and contributed to build validation on mobile, PC and console.
- Experience with regression and ad hoc testing and the identification, reproduction and follow-up of game defects.

Technical translation review 2020

Criando Games em 3D

- Reviewed the Portuguese translation of Building 3D Digital Games for Dummies, published in Brazil by Alta Books as Criando Games em 3D.

Narrative designer Sep 2021–May 2022

Down Below

- Wrote game lore in Portuguese and English, developed characters and prepared the whitepaper and game design documentation with the team.

Digital games instructor

Faculdade Impacta de Tecnologia

- Taught Quality and Testing for Digital Games, game development environments and games for mobile devices.
- Taught game QA practices, bug documentation and feature validation through practical testing exercises.
